

WRH Ecosystem Navigation Map

What Really Happened™ | Capitol Contracts LLC

Purpose

This document defines the navigation structure for the WRH ecosystem.

WRH must remain easy to review from three directions:

1. **Institutional buyers** need to understand what WRH is, what it costs, and how a pilot works.
2. **Program operators and facilitators** need to understand how WRH is delivered.
3. **Federal or grant reviewers** need to understand compliance, scope, sustainability, and implementation logic.

The system should not depend on one giant document. It should use clear front doors, direct links, and stable document hierarchy.

1. Primary Front Doors

Institutional / Outreach Front Door

Use this link for outreach emails, reviewer packets, and partner conversations:

https://github.com/daniel-lingar/wrh-master-curriculum/blob/master/WRH_REPOSITORY_INDEX.md

This is the main public-facing review path.

Master System Front Door

Use this for the highest-level WRH map:

https://github.com/daniel-lingar/wrh-master-curriculum/blob/master/WRH_MASTER_DOCUMENT.md

Executive Navigation Front Door

Use this for leadership, buyers, internal reviewers, and strategic partners:

<https://github.com/daniel-lingar/wrh-master-curriculum/blob/master/docs/executive/NAVIGATION.md>

2. Six-Level Document Hierarchy

Level 1 — Master Document

Purpose: system overview and main orientation.

Primary asset:

- WRH Master Document
- WRH Repository Index

Role: explains the whole WRH ecosystem and points readers to the correct layer.

Level 2 — Core Theory

Purpose: explain the two core engines.

Assets:

- WRH Identity
- Survival Map
- Trajectory Engine
- Visual Model Sheet

Core models:

Survival Map

The Flood → The Alarm → Survival Moves → The Rescue Boat → The Way Back

Trajectory Engine

Pattern → Fork → Interrupt → Repetition → Evidence → Direction

Role: gives readers the intellectual and instructional foundation of WRH.

Level 3 — Program Delivery

Purpose: house the curriculum and teaching materials.

Assets:

- 75-Session Master Index
- Session scripts
- Facilitator guide

- Participant handouts
- Sample session pages
- Session 16 “The Alarm” sample page

Role: proves WRH is not only a concept. It is deliverable curriculum.

Level 4 — Implementation

Purpose: show how WRH is deployed safely and consistently.

Assets:

- 30-Day Exploratory Pilot Description
- 90-Day Pilot-to-Implementation pathway
- Deployment system
- Fidelity checklist
- Feedback questions
- Readiness checklist
- Evaluation framework

Role: shows organizations what participation requires and how implementation is controlled.

Level 5 — Commercial Systems

Purpose: explain pricing, packaging, buyer language, and contracting path.

Assets:

- Buyer System
- Sales System
- Product catalog
- Pricing sheet
- Licensing structure
- Statements of Work
- Outreach email templates
- Follow-up cadence

Pricing structure:

- No-cost 30-day exploratory pilot
- \$9,500 — 90-Day Pilot-to-Implementation Bundle
- \$18,500 — Foundation Package
- \$28,500–\$36,000 — Expanded Implementation
- \$48,000 — Master Package

Role: converts interest into a clear next step.

Level 6 — Federal Systems

Purpose: support federal, grant, and institutional review.

Assets:

- Federal System Module
- Logic model
- Compliance language
- Sustainability plan
- SDVOSB / VOSB positioning language when verified
- Capability statement
- Risk governance
- Non-clinical scope language

Role: prepares WRH for grant-funded, VA-adjacent, justice-adjacent, and public-sector pathways.

3. Dual-Repository Structure

Capitol Contracts Repository

Purpose: procurement-facing company hub.

Should contain:

- company overview
- UEI / CAGE identifiers
- leadership structure
- ownership and control roles
- capability statement
- federal readiness roadmap
- NAICS alignment
- contracting language
- business plan
- pricing and offer structure

Role: proves Capitol Contracts LLC is the business vehicle.

WRH Master Curriculum Repository

Purpose: instructional and implementation hub.

Should contain:

- WRH Master Document
- Repository Index
- Executive Layer
- Survival Map
- Trajectory Engine
- 75-session curriculum
- facilitator materials
- pilot documents
- reviewer packet components
- federal and buyer systems

Role: proves WRH is the product system.

4. Reviewer Packet Structure

The Reviewer Packet is the lightest entry point for a new lead.

It should include:

1. WRH One-Page Overview
2. 30-Day Exploratory Pilot Description
3. WRH Visual Model Sheet
4. Session 16 Sample Page — The Alarm
5. Feedback Questions

Purpose: give a director enough to evaluate WRH without reading the full repository.

5. Outreach Execution Path

Initial Link

Use the Repository Index:

https://github.com/daniel-lingar/wrh-master-curriculum/blob/master/WRH_REPOSITORY_INDEX.md

Follow-Up Cadence

Day 1 — Initial email

Day 4 — Follow-up with one-page overview

Day 10 — Final soft follow-up

After that — stop unless they respond

First Five Outreach Targets

1. Arisa Health / Ozark Guidance
 2. Our House
 3. Pathway to Freedom
 4. Washington County Drug Court
 5. VA Fayetteville Veterans Justice Outreach
-

6. Evidence Position

WRH should not claim proven outcomes before implementation data exists.

Use this language:

WRH is entering exploratory pilot review. The purpose of the first Arkansas pilot is to gather field feedback, assess fit, and identify measurable implementation outcomes before broader deployment.

Do not use:

- clinically proven
- evidence-based treatment
- guaranteed outcomes
- therapy
- crisis intervention
- medical care
- legal advice

Use:

- evidence-informed
 - pilot-stage
 - non-clinical educational framework
 - trauma-literacy curriculum
 - directional-change model
 - site-specific feedback
 - implementation outcomes to be developed during pilot
-

7. Brand and Navigation Rules

WRH documents should use:

- direct language
- mechanical explanations
- short sections
- clear headers
- no exaggerated claims
- no clinical overreach
- no motivational fluff
- no hidden links
- one primary next step per document

Every major document should answer:

1. What is this?
 2. Who is it for?
 3. What problem does it solve?
 4. What should the reader do next?
 5. Where does this document sit in the WRH hierarchy?
-

8. Current Production Status

Complete

- WRH Repository Index
- WRH Master Document
- Executive Navigation Map
- One-Page Overview
- 30-Day Exploratory Pilot Description
- Visual Model Sheet
- Session 16 Sample Page
- 75-Session Master Index
- Outreach email sequence
- Follow-up cadence
- Pricing architecture
- Five-year business plan

Still Needed

- Combined Reviewer Packet PDF
- Pilot feedback form
- Capability statement

- Capitol Contracts procurement front door
 - Simple CRM / outreach tracker
 - First five emails sent
-

9. Next Action

The next production step is to assemble the **Reviewer Packet PDF**.

The next business step is to send the **first five outreach emails**.

Do not build more theory before market contact.
