

WRH 30-Day Exploratory Pilot

Program Description & Offer — One Selected Arkansas Partner

Capitol Contracts LLC
capitolcontracts@outlook.com
UEI: HH77KN5AV5X7 | CAGE: 9ZPJ6

1. PURPOSE OF THE PILOT

What Really Happened (WRH) is a 75-session structured trauma-literacy curriculum developed by Capitol Contracts LLC. It teaches survival patterns, nervous-system adaptation, and behavioral loops as plain-language mechanics — not clinical diagnosis, not therapy, not disclosure-based.

WRH is currently entering exploratory pilot review. The purpose of the first Arkansas pilot is to gather field feedback, assess program fit, and identify measurable implementation outcomes before broader deployment. We are selecting one Arkansas partner for a no-cost 30-day exploratory pilot.

2. WHO QUALIFIES

The pilot is designed for Arkansas-based programs operating in one or more of the following settings:

- Recovery support and peer-delivered programs
- Reentry and justice-involved service organizations
- Drug court, specialty court, or diversion programs
- Veteran-serving organizations and treatment courts
- County nonprofits and community service programs
- Institutional training environments where survival behavior is a presenting challenge

The ideal pilot partner has staff who regularly encounter participants whose behavior is misread as defiance, noncompliance, or moral failure — and who want a shared language for understanding what is actually happening.

3. WHAT THE SITE COMMITS TO

The pilot ask is intentionally light. The site agrees to:

- Designate one staff contact as the pilot liaison
- Review the WRH overview document and Repository Index before the orientation
- Attend one 45-minute orientation session by phone or video
- Identify one small staff or participant use case to apply during the 30 days
- Review 1–2 sample WRH teaching tools provided by Capitol Contracts
- Provide written feedback at the end of 30 days (structured form provided)

The pilot does not require running a full participant cohort, hiring additional staff, or committing to a paid implementation. It is a structured review with a defined endpoint.

4. WHAT CAPITOL CONTRACTS DELIVERS

- Pre-orientation access to the WRH one-page overview and Repository Index
- One 45-minute orientation call — WRH framework, Survival Map, Trajectory Engine, and how the curriculum fits the site's population
- Two sample WRH teaching tools (Survival Map handout and Trajectory Engine handout)
- One sample session page (Session 16 — The Alarm) showing curriculum voice and structure
- A structured 30-day feedback form
- A post-pilot review call to discuss findings and whether a 90-day implementation is a fit

5. WEEK-BY-WEEK TIMELINE

Week	Activity	Who
Pre-launch	Site reviews WRH overview and Repository Index. Capitol Contracts confirms pilot contact and schedules orientation.	Both

Week 1	45-minute orientation call. WRH framework overview, Survival Map, Trajectory Engine, and use-case identification.	Both
Week 2	Site receives sample teaching tools and Session 16 sample page. Staff reviews materials and identifies application points.	Site
Week 3	Optional mid-point check-in (15 minutes). Questions, observations, early feedback. Not required.	Both
Week 4	Site completes written feedback form. Capitol Contracts reviews and prepares post-pilot summary.	Both
Day 30+	Post-pilot review call. Discuss findings, fit assessment, and whether a 90-day paid implementation makes sense.	Both

6. FEEDBACK COLLECTED AT 30 DAYS

- Did the WRH framework language resonate with your staff and/or participants?
- Which WRH concepts were most applicable to your population?
- What gaps or misalignments did you notice?
- How did the non-clinical, non-disclosure framing land in your setting?
- Would you recommend WRH to a peer organization? Why or why not?
- What would need to be true for a 90-day implementation to make sense for your program?

Feedback is used to refine the WRH pilot model and inform the 90-day implementation design. Site feedback is confidential and will not be shared publicly without written consent.

7. WHAT HAPPENS AFTER 30 DAYS

Option	Description	Cost
No further action	Pilot closes. Site retains all materials reviewed. No obligation.	None
90-Day Pilot-to-Implementation Bundle	Full staff orientation, participant workshop series, coaching, fidelity tools, and evaluation framework.	\$9,500
Foundation Package	Sessions 1–26: System Logic Map. Full Part I delivery with facilitator standardization.	\$18,500
Master Package	Full 75-session program with facilitator toolkit, fidelity tools, and evaluation system.	\$48,000

Pricing is per cohort (8–12 participants). Scope, delivery model, and site size may affect final contract terms.

8. EVIDENCE AND EVALUATION STATUS

WRH is entering exploratory pilot review. The purpose of the first Arkansas pilot is to gather field feedback, assess program fit, and identify measurable implementation outcomes before broader deployment.

The WRH model is built on established mechanism frameworks for trauma response, nervous-system adaptation, and behavioral pattern interruption. It is not positioned as a clinically validated treatment protocol. It is positioned as a structured, non-clinical trauma-literacy framework designed for peer-deliverable settings.
